教員紹介(教育業績書)

氏名ひらがな職位所属(学科等)安部恵美子あべえみこ教授保育学科

教育理念(学生へのメッセージ)

専門的知識や技術を活かして子どもの成長を促す「環境」を創造する力を持ち、子どもと共に自らも成長しようとする保育者を目指してください。

教育の責務

地域の保育の発展と向上に貢献できる心豊かな保育者を育成します。

保育者のキャリア形成に関する課題に気づき、解決へ導く力を育成します。

教育方法

講義形式の授業と試験を通して、保育職として押さえておくべき保育の制度や歴史に関する基本的知識の 習得・再生・定着を図ります。

保育職に必要な文書講読・文書作成に関するスキルの向上を目指した基本的演習を行い、さらに、言語・文章による表現力を高めるために、保育の現代的課題をテーマとするプレゼンテーション・討論の場を設けます。

他者評価

教員の一方的な講義は、学生にとって難解で退屈に思えることがあります。分かりやすい講義資料の作成や、人物伝等を使ったストーリー性を持たせた歴史の説明などを試みることによって、興味を喚起する授業への改善を図ります。

学生の学修成果

技術に関する学修成果と較べて、知識に関する学修成果は、保育者になってから直接役立っていると感じる 経験は少ないと思います。しかし、授業で身につけた知識を卒業後に再生産・活用する場合には、学生時代よ りもずっと理解が深まると卒業生からよく聞きます。これからも、卒業生の心に残り、保育の現場に役立つ講義 をしていこうと思います。細くて長い学修成果を目指します。

今後の目標(短期・長期)

保育の世界には「変わらないこと」と「変わっていくもの」があります。今後は、保育者が備えるべきマインド等の「変わらないこと」を大事にしながらも、変化の激しい「変わっていくもの」、例えば、保育環境を変える AI 技術や、子育て支援策の動向等に関する情報を、分かりやすく保育者の卵たちに伝えていきたいと思います。

Faculty introduction (Educational achievements)

Name Position		Affiliation (Department, etc.)	
Abe Emiko	Professor	Department of Early Childhood Education	

Education philosophy (Message to students)

Students should aim to be childcare workers who have the power to create an environment that promotes the growth of children by utilizing their specialized knowledge and skills, and who also want to grow with their children.

Educational responsibilities

Special Lecture on Childcare Special Lecture on Childcare Documentreading presentation

Principles skill exercise

Childcare Practitioner Introduction to Academic Childcare principle

Studies

We foster rich-minded childcare workers who can contribute to the development and improvement of local childcare.

Students will develop the ability to recognize issues related to the career development of childcare workers and lead them to solutions.

Education method

Through lecture-style lessons and exams, students acquire, develop, and establish the basic knowledge about the childcare system and history necessary for a childcare worker.

Room is made for presentations and discussions on the theme of contemporary childcare issues in order to conduct basic exercises aimed at improving the skills necessary to read and create documents, and to improve the expressiveness of language and sentences.

Evaluation by others

One-sided lectures by teachers can seem esoteric and boring to students. We will try to improve the lessons and arouse interest by creating easy-to-understand lecture materials and trying to explain the history with stories personal biography.

Student achievements

Compared to the learning related to technology, I think that the learning related to theory is less likely to be directly useful after becoming a childcare worker. However, I often hear from graduates that when they reproduce and utilize the theory they have acquired in class after graduation, their understanding is much deeper than when they were students. I will continue to give lectures that will remain in the hearts of graduates and will be useful in the field of childcare. We aim for both short and long term learning outcomes.

Future goals (short term and long term)

In the world of childcare, there are things that do not change and things that change. In the future, while valuing the unchanging things, such as the mindset that childcare workers should have, I would like to convey to the nursery teachers information on rapidly changing things, such as AI technology that changes the childcare environment, and trends in childcare support measures, etc.

Specialized field (academic field / major)

Childcare training Higher education

Research theme (research area)

Short-term higher education and Trends in university education
